

Endolyne Technology Services

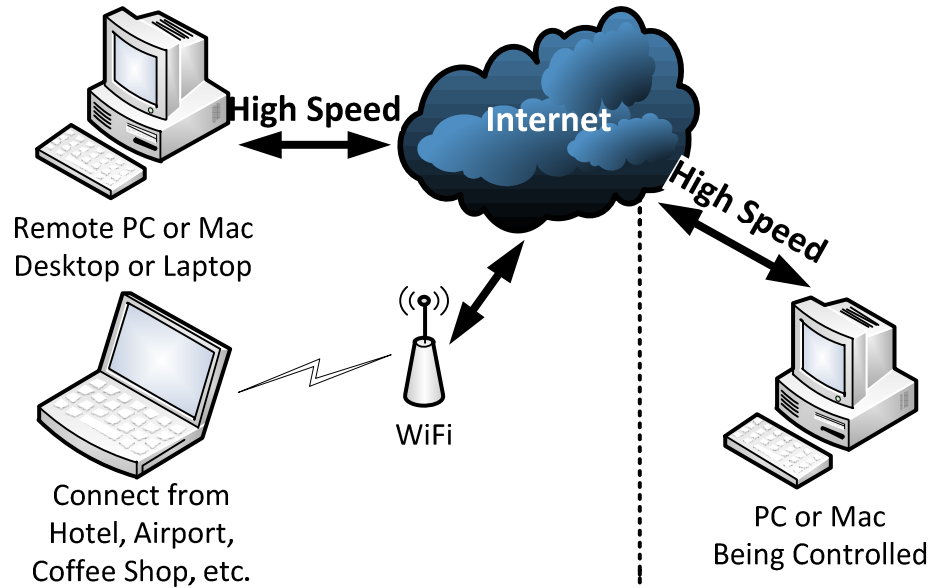

\$49

+ tax. Includes software and labor. Does not include cost for external drive, if required. This price is subject to change.

Remote Control

Service Includes:

- ✓ Installation of remote control software on PC or Mac to be controlled.
- ✓ Creation of on-line account with LogMeIn
- ✓ Configuration of firewall settings to allow access
- ✓ Configuration of power profiles to keep your machine available for connections
- ✓ Verification of proper operation
- ✓ Demonstration of usage

This service is based on the highly popular LogMeIn remote access and control service.

This service allows you to control an Internet-connected PC or Mac from any other computer with an Internet connection. (High-speed connections are strongly recommended.)

Simply open a web browser on the remote PC and log in to the LogMeIn website, from there you will be connected to your computer.

There is a highly-capable free version of the LogMeIn service available as well as a paid version that adds remote-to-local printing and file transfer capabilities.

PC and Mac OS X

Use either a PC or Mac to control either a PC or a Mac

Multi-Monitor Support

Multiple monitors are supported, even on the LogMeIn free version

Always available

We'll modify power and firewall settings to make sure your computer is always available

Clipboard Sync

Cut, copy and paste text with a clipboard that is synchronized between the computers

Screen Blanking

Protect your privacy while operating the computer remotely

Usage Demo

We will show you how to use the service and control your computer
